3.24 – Scanner redirection

Spark View provides two different method for scanner redirection:

1. Please use the TWAIN Virtual Data Source if your scanner has TWAIN driver and your application supports TWAIN scanner. OR
2. Please run the SparkScan.exe in RDP server to scan from a local scanner which supports TWAIN, WIA (windows) or ICA (Mac OS) scanner.

Virtual TWAIN Data Source deployment (Need to deploy it on the RDP server first):

1. Create a directory under windows\windows\twain_32, for example: RemoteSpark
2. Copy SparkDataSource.ds to this directory: windows\windows\twain_32\RemoteSpark\SparkDataSource.ds

   The name of the directory or SparkDataSource.ds can be changed.
   Run `SparkScan /?` to show the help information.
