

5.1 – Session management

You can use config.html to check session status, terminate or join a session on the gateway:

The screenshot shows a web browser window with two tabs: 'SparkView Dashboard' and 'Spark Configuration'. The address bar shows 'localhost:8080/config.html'. The page has a header with 'Gateway: localhost:8080' and a password field. Below the header is a 'Start Configuration' button. The main content area has a tabbed interface with tabs for 'Gateway', 'Server', 'User', 'Symlink', 'Session' (selected), 'Server Group', and 'User Group'. Under the 'Session' tab, there is a 'Sessions' section with a 'Refresh' button and 'Total: 1'. Below this is a table with columns: Id, Server, Client IP, Browser, Start Time, Numericid, User, Domain, Join, Protocol, Symlink, Thumbnail, Port, and Action. The table contains one session entry with Id '201050d6-414e-45ed-b7eb-405e299bd808', Server 'localhost:22', Client IP '0:0:0:0:0:0:1', Browser 'Mozilla/5.0 (Macintosh; Intel Mac OS X 10_15_7) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/100.0.4896.75 Safari/537.36', Start Time 'Tue Apr 05 17:06:28 CEST 2022', Numericid '210825197', User 'root', Domain, Join, Protocol 'SSH', Symlink, Thumbnail, Port '22', and Action icons. Below the table is a 'JavaScript console command' section with the following text: 'sparkConfig.notify('my message'); //send message to all. sparkConfig.notify('my message', [123456789, 123456788]); //send message to session 123456789 and 123456788.'

Gateway: localhost:8080 Password:

This page can only be accessed from local computer. Set password and remoteManage=true in gateway.conf to enable remote access.
